

PELTECH LLC

SYSTEM SERVICES

PelTech offers a variety of system services, from unboxing and setting up your latest purchase to building custom gaming PCs. Whether you need a simple Facebook machine or a powerful work system, we've got you covered.

Custom Gaming PCs require special attention to hardware, benchmarks, and cable management, so these builds may take longer. We take pride in our work and sometimes need extra time to get it right.

PC Setup: A technician will set up your computer, including unboxing, connecting peripherals, and configuring Windows, software, internet, updates, and drivers. For gaming PCs, we assist with platforms like Steam, EA Launcher, and Discord. This service is billed at \$24.99/hr.

Note: We do not support Apple products at this time.

Custom PC Solutions: We'll help you choose hardware for a standard desktop PC (select "Gaming PC Solutions" for gaming builds) and assemble all components. Windows installation is included, but the license fee is separate. This is billed at a flat-fee of \$99.99.

Gaming PC Solutions: We'll help you choose hardware for a gaming desktop PC and assemble all components. Windows installation is included, but the license fee is separate. Benchmarking software will be run to ensure optimal experience and stability. This is billed at a flat-fee of \$199.99.

If you're interested in a custom gaming solution, contact us to discuss your goals, including preferred platform (AMD vs Intel), games you'll play, play style (Casual vs Competitive), and any additional activities (e.g., Graphic Design, Video Editing, 3D Rendering, or Streaming on Twitch/YouTube). Also, let us know if you need peripherals like a keyboard, mouse, monitor, headphones, or a headset.

Note: We do not offer Hardline Tubing for custom water cooling. We are unable to accommodate those requests at this time. Sorry for any inconvenience.
